January, 2026

How To Use This Summary

The Public Lands Inventory (PLI) Report: **SUMMARIES OF GOVERNMENT LEVELS ORDERED BY COUNTY** shows the totals of property held by the following governmental levels; State Government, Federal Government, Municipal Government, County Government, Special Districts, Volunteer Fire Departments, and Other Non-Private Agencies. The report is generated in alphabetical order by county. There are eight columns of data relating to each governmental level. Each column is described below.

1. **Total Parcels.** This is the total number of parcels for the government level.
2. **Parcels As S/D lots.** This shows the number of parcels given as subdivision lots. For these parcels, no acreage number can be obtained.
3. **Parcels As Frontage.** Parcels given as front foot or effective front foot. No acreage figure can be obtained.
4. **Parcels With No Size Data.** There is no information given regarding the size of the parcel.
5. **Parcels With Acreage.** The parcel size is given in acres, or was calculated to obtain an acreage figure.
6. **Total Acreage.** The total number of acres of those parcels with acreage data.
7. **Parcels With Value Recorded.** The total number of parcels with a monetary value recorded.
8. **Total Value Recorded.** The sum of the recorded monetary values for the given government level.

At the bottom of the page is the total for each of the eight columns. Totals for the entire state are located on page 70.
